Toxic Reduction Policy Statement of Intent

Skyjack Inc. (Skyjack) Plant 2 Facility (Plant 2) uses heavy aromatic naphtha (naphtha) in two processes. The Facility does not intend to reduce the use and release to air of this toxic substance at the Facility at this time. Skyjack does not create naphtha; therefore this plan will not address reducing its creation.

Reduction Objectives

The objective of this Plan is to identify and evaluate a variety of toxics substance reduction options to reduce the use, disposal and release to air of naphtha at the Facility. Further, this plan will determine the technical and economic feasibility of each option to determine which, if any, are viable for implementation at this time.

Description of Facility

Skyjack Inc. manufactures conventional and rough-terrain scissor lifts. The units undergo welding and pre-treatment in various production lines, and are then coated using various painting spray booths, then assembled, tested and stored. Naphtha is used at the Facility as a constituent compound in various paint products.

The North American Industry Classification System (NAICS) Code that applies to this Facility is 333920 – Material Handling Equipment Manufacturing.

In 2013, the Facility operated 24 hours per day, 5 days per week.

Toxic Substance Reduction Options to be Implemented

There were no new options identified that can be implemented by Skyjack to reduce the use, disposals or releases of naphtha.

Plan Summary Statement

This plan summary accurately reflects the content of the toxic substance reduction plan for Skyjack.

Certification by Highest Ranking Employee
